GLOBAL ALWAYS OCCASIONAL USE

Today's fast-paced, constantly changing world needs a communications infrastructure to match. SES WORLD SKIES' Global Always On Occasional Use resources provide organizations everywhere with a flexible, economical means of bringing robust communications services — from video to IP, data and voice — to wherever they need them, just in time.

Worldwide coverage

SES WORLD SKIES' fleet — part of SES' 40 spacecraft constellation — provides global coverage in C-band and comprehensive landmass coverage in Ku-band, offering a multitude of connectivity possibilities for any communications application. Three new satellites to be launched within the next year will provide additional coverage of and capacity over the Americas, Europe, Africa and Asia.

SES WORLD SKIES Occasional Use capacity is currently available on:

AMC-1 at 103° West

AMC-3 at 87° West

AMC-5 at 79° West

AMC-6 at 72° West

NSS-7 at 338° East

NSS-9 at 183° East

NSS-10 at 322.5° East

NSS-11 at 108.2° East

NSS-703 at 57° East

NSS-806 at 319.5° East

Occasional satellite access and capacity solutions for television

SES WORLD SKIES provides capacity across its fleet of satellites for the Occasional Use needs of broadcasters and can arrange access services as needed through SES and partner teleports in key regions. Occasional Use customers can count on the same rapid, flexible and close organizational support enjoyed by full-time lease holders, for feeds lasting from 15 minutes to several months.

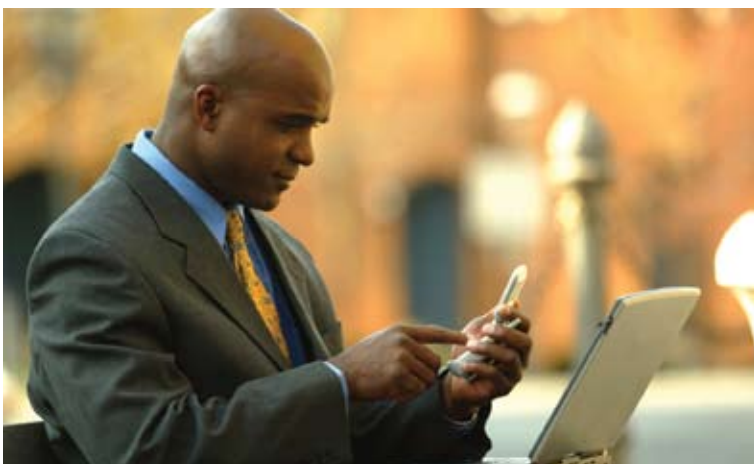

Rapid response and quick links for breaking news

When breaking news happens, SES WORLD SKIES can quickly provision the satellite and terrestrial links you need to transmit signals from the field to the studio, or among dispersed media facilities, in any region of the globe. Our Occasional Use team is available 24 hours a day, 365 days a year to fulfill your requirements on-demand.

Pre-booking for sports and other anticipated events

For planned occasions, such as sporting and entertainment events, customers can pre-book capacity from one to 365 days in advance. We update our Occasional Use inventory in anticipation of world events in an effort to ensure that customers have the best capacity available where and when they need it most.

Occasional Use for private, enterprise and government communications

SES WORLD SKIES can provide on-demand capacity for a host of data and communications applications ranging from maritime and military, to tele-medicine and relief operations, and more. We offer smaller, customized bandwidths for periods ranging from a few minutes to multiple months.

GLOBAL ALWAYS OCCASIONAL USE

Our Occasional Use team is available 24x7x365 to ensure your connections perform flawlessly from order to transmission time.

Pre-book your Occasional Use capacity from any computer, at any time with STARS Online.
